ABOUT ME

Software Engineering student that is passionate about technology and art, experienced with C#, Agile/Scrum Methodologies, Object-Oriented design, and SOLID principles.

Currently learning C++, DevOps practices and security. Seeking an internship for the third year of my bachelor's degree.

EDUCATION

- Bachelor of Science in ICT & Software Engineering
  Fontys Hogeschool ICT
  September 2020 – Present

- HAVO + Business class (Hoger algemeen voortgezet onderwijs)
  KSE (Katholieke Scholengemeenschap Etten-Leur e.o.)
  September 2018 – June 2020

- KADER + MAVO (Voorbereidend middelbaar beroepsonderwijs)
  Munnikenheide College voor MAVO VBO LWOO
  September 2014 - June 2018

PROJECTS

CM.com - Validation of MO/MT Messages Workflow
September 2021 - December 2022 (Third Semester)
Working in a group of 6 to create a user-friendly web app to improve test flow from end-users that sends and receive messages from different channels, using Kotlin, Next.js and Docker PostgreSQL with CM Business API, AURORA, and dashboard.
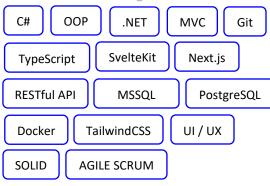

CIMSOLUTIONS – Aanmeld-app
December 2021 - June 2021 (Second Semester)
Together with 6 other team members develop and create a sign-on app for participation in (meet) sessions at CIMSOLUTIONS for internal use on all devices and using technologies that can communicate with Office 365 and Outlook 365. Tech Stack: C# .NET CORE MVC with Razor pages and docker PostgreSQL.
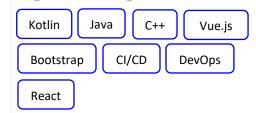

SKILLS
Intermediate knowledge

C# · OOP · .NET · MVC · Git · TypeScript · SvelteKit · Next.js · RESTful API · MSSQL · PostgreSQL · Docker · TailwindCSS · UI / UX · SOLID · AGILE SCRUM

SKILLS
Beginner knowledge

Kotlin · Java · C++ · Vue.js · Bootstrap · CI/CD · DevOps · React

PERSONAL

In my spare time, I study Japanese, learn, and play the piano and practice flute at a music school. I also play various board games and often play games on PC with friends to relax. I also have a broad flightSim to chill with.

I am also a very curious person, so I can go down any rabbit hole that interests me and try to grasp it.
